DIRECTORY OF ASSESSMENT SERVICES FOR DEVELOPMENTALLY HANDICAPPED PEOPLE IN ONTARIO

INTRODUCTION

This Directory has been prepared to assist people working with developmentally handicapped children and adults in Ontario to obtain assessment services. It provides details of service mandates capacities, professional staff available and travelling teams.

The Directory is one of several projects carried out by the Ministry of Community and Social Services to facilitate effective individual program planning for developmentally handicapped clients of Ministry-funded services. These projects also include a review of functional assessment instruments that are useful for front line staff, and proposed standards and guidelines for individual program planning. Titles of these and other volumes in this series of publications are listed opposite*.

Assessments and Individual Program Planning

Assessment is considered essential to developing an individual program plan. The individual program plan is a written plan for action outlining steps to meet personalized goals for a developmentally handicapped person. It is developed and implemented by a team including the individual and the individual's family as appropriate and based on a thorough assessment that reflects a holistic view of the individual.

Assessment is, for individual program planning purposes, the process of identifying the individual's strengths, resources and capabilities as well as developmental handicaps and the ways in which the severity of these handicaps can be reduced. Assessments should:

- determine whether, and to what degree, an individual has developmental handicaps;
- identify the individual's strengths and developmental needs;
- identify the conditions that appear to impede the individual's development;
- identify what services and supports are needed to move the individual towards increasingly independent functioning.

Detailed standards and guidelines for the assessment process are contained in the proposed standards and guidelines for individual program planning which are currently in the public consultation stage.*

---

* Readers of this Directory who are interested in obtaining a copy of the proposed standards and guidelines for individual program planning, or other volumes in the Program Development Series may write to:

Project Management & Implementation Planning Unit
Ministry of Community and Social Services
700 Bay Street
9th Floor
Toronto, Ontario

Telephone: (416) 965-3130

HOW THE DIRECTORY WAS CREATED

The Directory was prepared as part of a project, Assessments for Developmentally Handicapped Individuals, carried out for the Ministry of Community and Social Services by the consulting firm Abt Associates of Canada. The project comprised a survey of assessment resources in the province available for developmentally handicapped individuals, as well as the review of assessment instruments and standards and guidelines for assessment referred to above.

In the Spring of 1982, interviews were conducted by the consultants with about 100 directors and program staff in 28 Associations for the Mentally Retarded (AMRs) across the province. Each respondent was asked to identify assessment services available to their program. Telephone interviews were then conducted with the services identified to determine the precise services offered. Additional services identified during these initial interviews were added to the list.

The Directory does **not** include those agencies whose assessment services are provided exclusively to their own clients. Although a general hospital will see a developmentally handicapped individual for any of their usual services, they are included in the Directory only if they provide a specialized service for this population.

HOW THE DIRECTORY IS ORGANIZED

Assessment services are indexed alphabetically on p. iv and organized alphabetically by region. The four regions are Central, North, Southwest and Southeast. The primary mandate of the assessment service is indicated in the upper right hand corner. In some cases, e.g., deaf, physical handicaps, etc., this indicates that such a condition is the first priority of the service.

At the back of the Directory on p. 63 is a separate listing for travelling teams or satellite services. These are listed by geographic location and cross-referenced to the primary assessment service listing.

KEEPING THE DIRECTORY CURRENT

Some assessment services currently available have undoubtedly been omitted because they were not identified by any of the AMRs contacted. You may be aware of some additional services in your area.

Also, new services develop and known ones change their mandate. Some services in both categories were discovered during the interview process.

Blank directory forms are included at the back of each section of the Directory. These can be completed for services in each Region which have been omitted. The Ministry will be evaluating the effectiveness of this Directory based on feedback received; consideration will be given to updating the Directory in future.

DISTRIBUTION OF THE DIRECTORY

The Directory is being distributed to agencies in Ontario funded by the Ministry of Community and Social Services to provide services to developmentally handicapped people. These include local Associations for the Mentally Retarded and other charitable organizations. Approximately 1,200 copies of the Directory will be provided to these agencies for distribution to their various residential, vocational and support service programs. Other agencies and interested parties may also obtain copies of this Directory by writing to:

Project Management & Implementation Planning Unit
Ministry of Community and Social Services
700 Bay Street
9th Floor
